

Elisa Speranza

President of CH2M HILL's Operations & Maintenance Business Group

Elisa M. Speranza is President of CH2M HILL's Operations & Maintenance Business Group. She is also the Executive Sponsor for the firm's Sustainability and Strategic Consulting practices. She holds a Masters in Public Administration from Harvard's Kennedy School and a B.A. in Political Science from Boston College.

Ms. Speranza has extensive experience working on both the public and private sides of the water, wastewater and municipal management business.

Ms. Speranza's past experience includes working on both the public and private sides of the water, wastewater and municipal management business. Prior to her current position, she spent seven years with CH2M HILL's Water Business Group, serving in a number of leadership roles. Most recently, she led the group's Utility Management Solutions (management consulting) team. Prior to joining CH2M HILL, she worked for several other firms and operated her own consulting practice. From 1992 to 1996, she was Deputy Director of the Massachusetts Water Resources Authority and previously was a Project Manager for the Boston Water and Sewer Commission.

Ms. Speranza is past Board Chair of the global nonprofit Water For People, which helps people in developing countries obtain clean water and sanitation solutions. She has served as an officer of the American Water Works Association and the Massachusetts Water Works Association, and is a long-standing member of the Water Environment Federation. Her work has been extensively published and presented, and in 2007 she received the AWWA's Outstanding Service and Honorary Member awards.

About CH2M HILL

Headquartered in Denver, Colorado, employee-owned CH2M HILL is a global leader in consulting, design, design-build, operations and program management for government, civil, industrial and energy clients. With more than \$7 billion in revenue and 30,000 employees worldwide, CH2M HILL delivers innovative, practical, sustainable solutions—helping clients develop and manage infrastructure and facilities that improve efficiency, safety, and quality of life.
